hCG Weight Loss Plan

HOMEOPATHIC WEIGHT LOSS!
LOSE UP TO A POUND A DAY*!

hCG AS SEEN ON:

The Weight Loss Cure "They"
Don't Want You To Know About
by New York Times
bestselling author
Kevin Trudeau

hCG Professional Formula is carefully designed to:

- ✔ Reset the hypothalamus
- ✔ Support the body in the elimination of toxins
- ✔ Manage and regulate blood sugar levels
- ✔ Support metabolic functions
- ✔ Control appetite and reduce cravings
- ✔ Support the body's immune system in reducing viral load
- ✔ Minimize the effects of trauma and stress

* This is an average. Individual results may vary.

What is hCG?

Human Chorionic Gonadotropin is a hormone that is produced naturally during pregnancy. In the 1950s a British endocrinologist named A.T.W. Simeons studied the effects of hCG on the body, discovering that it seemed to promote the burning of non-essential fat when administered to an individual on a low-calorie diet. His hCG diet **was later popularized by Kevin Trudeau in his book *The Weight Loss Cure "They" Don't Want You to Know About*.**

What is hCG's role in weight loss?

There are three types of fat in the body:

- structural fat, which cushions the organs
- essential fat, which acts as the body's fuel reserve
- non-essential fat, which accumulates around the hips, thighs, waist and stomach.

Normally, when an individual is on a very low-calorie diet the body gets the additional energy it requires by metabolizing lean tissue (muscle) and structural and essential fat first, leaving the non-essential fat deposits. Dr. Simeons noticed that hCG reversed the order, encouraging the body to release its non-essential fat reserves.

How does the diet work?

hCG Professional Formula is a homeopathic hCG with supportive ingredients. It is administered in the form of liquid drops under the tongue, in conjunction with a low-calorie diet. The accompanying manual: *Your hCG Guide to Become Finally! Fit* describes the diet and includes recipes and meal plans to help you achieve success.
